June 24, 1933

My dear Mr. Potter:

Receipt of your kind letter of June 16, 1933 is acknowledged and I regret to have to state in reply that circumstances make it impossible for me to accept your kind invitation to the Amateur Convention at Chicago in August.

For your information, I have a number of slides covering the electrical characteristics of electron coupled oscillators which I would be glad to loan should you find someone familiar with the circuits who would like to use the slides for a paper on the subject.

Very truly yours.

(Signed) J. B. Dow
